- **If the player participating is 12 and Under...**
Parents will need to set up an account under their name and then add the child's name under their USTA account.
- **If the player is 13 or Older...**
A child may set up their own USTA account, but parents might find it easier to still have them set up a primary account and list the child under their account.
- **If Parents already have existing accounts...** you can simply add your child to your account.

Membership numbers are assigned to both the parent and each child listed on the account. Children have separate profiles and membership number listed under their parents account.

Ask for your membership number when setting up the account. You will need this to complete registration for your team.

You may always access your profile and view your membership number at www.usta.com
