

Player Availability Tool

- Go to the Norcal website and find the NorCal Login option. It's the far right tab on the Home Page, and on the top right of most NorCal web pages, including your Team Page, top right corner. Click on it.
- Enter your membership number and you will be emailed your own password. If NorCal does not have your email address, ask your captain to forward it to the NorCal office.
- Return to this program with your new password and log in. This will take you to your Player Page. Find your team name. You can see the team names in the center section of the Team Page. (Maybe you will need to scroll down to see this section. It has blue and white stripes through it. You can't miss it.) Click on the team name. If you are on more than one team, click on the specific team name that you are trying to access.
- On the Team Page, top right, is a horizontal orange stripe. Find Player Availability, and click on it.
- You will see a table with player names and match dates. Click on your name and enter your availability status for each match. Then click SAVE at the bottom. You can go back in and change your status, but if you have an emergency and have to pull out of a line-up, contact your captain directly. Don't assume he checks that information every hour.
