

Program Preparedness Grant Definition

Grants will initially be available to facilities, organizations and individuals to purchase the supplies and equipment needed to protect our pros, coaches and players as they reopen and restart programming.

Facilities that were awarded the USTA National Facility Recovery Grant are still eligible to submit a request for section support.

Applications will be accepted until **June 12, 2020**. We encourage you to apply early as applications will be evaluated in the order in which they are received.

Criteria for facilities, organizations or individuals to be eligible for grant:

- Acknowledgement and agreement of non-discrimination practice and policy
- Good standing with local, state and federal regulations
- Open to the public for play and/or programming
- Teaching pros are Safe Play compliant or agree to become compliant within 90 days of Grant Award
- Organization or individual has a prepared plan to safely reopen facility/courts and restart tennis programs
- Other criteria at the discretion of the review team

The full list of expenses authorized under the Program Preparedness Grant can be found on the PPG Expenses document.

If your application is approved, grant amounts will be allocated based on size and scope of your programming.

Please note this grant is only available to providers that will restart programming in 2020.

The purpose of the grant is to help defray some of the tennis-related costs associated with the reopening in 2020. The grants are not intended to cover lost income, dues or lost revenue while closed due to the pandemic.
